ISO SR – background

- **May 2001 - May 2002:** the ISO committee for consumer issues (COPOLCO) initiates CSR study
- **September 2002 - April 2004:** ISO Strategic Advisory Group on Social Responsibility reports
- **September 2004:** The leadership responsibility assigned to ABNT(Brazil) and SIS (Sweden) after nomination process.
- **January 2005:** ISO Working group (WG) established.
- **2005-2006:** Meetings (350 experts from 60 countries) every 6 months

Beslutat från början:

- Titel: Guidance on Social Responsibility
- Nr: ISO 26000
- Typ av standard: Vägledning
(ej “skall-krav” för tredjepartscertifiering som ISO 14001)
- 3 års utvecklingstid – färdig standard 2008
- Sex experter per land:
”Industry, Government, Consumer, Labour, Non-governmental organization (NGO), Service/Support/Research/Others”

Decided that ISO 26000 will...

- Provide practical guidance related to:
 - operationalizing social responsibility;
 - identifying and engaging with stakeholders; and
 - enhancing credibility of reports and claims made about social responsibility.
- Promote common terminology in the field;
- Emphasize performance results;
- Be consistent with and not in conflict with other existing SR standards and requirements
- Be applicable by all types of organizations.
